Making DOE smarter with artificial intelligence

Project Title	Making DOE smarter with artificial intelligence
Project Summary	This internship will explore artificial intelligence/machine learning, ways that DOE is using it, and opportunities to use it more (especially in the public sphere).
Country	United States

Project Description

The team will focus on:
- Exploring building an Amazon Alexa Skill (and other smart assistants) to make DOE's content accessible to that new audience
- Creating an inventory of artificial intelligence and machine learning projects throughout DOE (including its 17 labs)
- Compile weekly artificial intelligence and machine learning news throughout the US Federal government
- Expanding internal wiki content on artificial intelligence and machine learning
